Files are permanently removed from your OneDrive recycle bin 30 days after they were deleted

Hi Jess,

We noticed that you recently deleted a large number of files from your OneDrive.

When files are deleted, they are moved to your OneDrive recycle bin. If you don't restore deleted files from the OneDrive recycle bin, they are permanently deleted after 30 days.

If you want to restore these files, go to the [OneDrive recycle bin](#), select what you want to restore, and click the Restore button.

You can ignore this mail if you meant to get rid of these files.

[Go to OneDrive recycle bin](#)
